

## URGENT MESSAGE CONCERNING MAINFRAME PASSWORDS

Sometime within the next few days starting 9/10/2003, users with a User ID for an application residing on one or more of the NAPROD, NACOMN, or MSMIS (MIS3090) systems will receive an e-mail instructing users on how to establish a Personal Identification Number (PIN) for identity authentication by the User PIN Verification System (UPVS). The PIN number was established to correct a security deficiency uncovered during a Security audit. The PIN will be required to have user passwords reset on these systems.

The request to set up the PIN is being done in stages (alphabetical order by last name).

Once you receive the email, you will have a 14-day period to set up the PIN and associated information. Following is a list of the applications residing on the three mainframe systems:

AMS	Acquisition Management System
CACS	Computer Access Control System
CaERTS	CaER Travel System
CAPPS	Consolidated Agency Personnel/Payroll System
CLTS	Centerwide Logging and Tracking System
CNEMS	NASA Equipment Management System Central Database
CNPPS	Consolidated NASA Personnel/Payroll System Support
CPTAS	Change Processing, Tracking, and Accounting System
DARTS	Dryden Accounting and Resource Tracking System
FYDB	Fiscal Year Data Base
GLWF	Gains Losses Workforce System
GWOS	Graphics Work Order System
ISIS	Integrated Security Information System
LABOR	Labor Cost System
LABOR	Labor Distribution and Tracking
NEMS	NASA Equipment Management System
NPDMS	NASA Property Disposal Management System
NPPS	NASA Personnel/Payroll System
NSMS	NASA Supply Management System
NTDS	NASA Training Development System
PAS	Personnel Awards System
PKIC	Photographic Keyword in Context
PROMIS	Procurement Management Information System
RAS	Retirement Annuity System
RMES	Retired MSFC Employees System
RSWOS	Reproduction Services Work Order System
SETS	Scientific and Engineering Travel System
TADS	Time Attendance and Distribution System
VEO	Vehicle Equipment Operations

The email will advise you of the following:

\* If you fail to establish your PIN information within the 14-day window, your UPVS account will be locked out and you will be ineligible to have any passwords reset on any NAPROD, NACOMN, or MSMIS (MIS3090) system until you setup your UPVS PIN information.

\* If you have questions, please contact one of the following:

Marshall employees contact the NISC at 4-Help (option 0).

All other NASA centers employees contact the NACC TSC at (256) 544-6673.
